	Key Features: Engage students in science by completing hands-on investigations that demonstrate and support concepts found in each chapter. Investigations are completed with CPO's precise equipment, provided with the purchase of books. Equipment is pictured in text, and ancillaries tie together the science concepts. The student text is student accessible and the science content is grade-level appropriate. One science concept per page, vocabulary words defined and used in context, and main idea headers summarize the content; graphics next to the text to support science understanding. The teacher's guide is designed with a unique lesson dialogue that scripts a classroom exchange between the teacher and the students. All sample dialogues follow the 5E model in that they begin by "engaging" the students so that they are ready to "explore"
